## OVERVIEW

Lantech T(P)WAP-5004 series is a next generation EN50155 multi-function VPN router w/ 1x 802.11ac Wi-Fi + 1x 4 Gigabit X-coded (PoE) Ethernet switch + 2 WAN/LAN ports + 2 serial ports\*\* that support advanced function of VPN, Load-Balancing, EMMC Flash Storage\*\*, Protocol gateway, Storage\*\*, Wi-Fi roaming for on-board / onboard-to-ground applications. The dual core CPU with 1.6GHz + 256M flash enables the router to multi-task smoothly.

### IEEE 802.11ac one band radio up to 2.6Gbps bandwidth

With IEEE 802.11ac capability, T(P)WAP-5004 can operate either 5GHz or 2.4GHz bands, offering the maximum speed of

2.6Gbps bandwidth (1.3Gbps per 802.11ac module). It is also compatible with 802.11b/g/n that can work with 2.4GHz for longer range transmission.

### Support AP/Bridge/Client mode, Mesh roaming

T(P)WAP-5004 supports AP/Bridge/Client mode for different applications.

It also supports client-base roaming to swap between the APs in a network.

### Built-in Wireless Mesh network (WMN)

T(P)WAP-5004 supports Mesh network composed of different nodes. The set of SSIDs allow the wireless client to roam freely without the need for complicated account management. With Mesh protocol, it can provide a reliable, scalable, stable and seamless network topology.

#### **Optional EMMC Flash storage\*\***

The optional EMMC flash storage on the router can offer 8G/16G/32G capacity.

#### **MIMO technology with 3T3R and standard SMA / optional QMA type connectors**

Lantech T(P)WAP-5004 series adapts MIMO technology with smart antenna transmission and reception for 3T3R. With six external detachable antenna SMA/QMA\*\* connectors and optional antennas, T(P)WAP-5004 can have better Wi-Fi coverage.

#### **Wireless WMM QoS**

T(P)WAP-5004 supports 802.11e standard which defines a set of Quality of Service for wireless LAN applications as well as WMM (WIFI multimedia)

#### **Advanced security & 16 SSIDs**

The security support standards including 64/128bits WEP, WPA/WPA2 PSK (TKIP, AES), 802.1x ensures the best security and active defense against security treads. Lantech T(P)WAP-5004 support up to 16 SSIDs, each SSID has its independent security and encryption.

#### **Load Balancing with 5 mechanisms for multi-WANs**

T(P)WAP-5004 supports Load Balancing for WAN connections. There are five schemes for Load Balancing function:

Pack	Algorithm	Description
Basic	Fixed	All traffic will be distributed to a single WAN.
	Failover	Routes connections through preferred WAN link while others stand-by. Sequentially activating another link if the preferred link fails.
	Priority	Select the active WAN according to priority.
	Weighted Round-Robin	Evenly distribute the traffic over all working WAN links in circular order according to the specified weights.
	Custom Route	Routing through the selected WAN for each specific traffic, ex: TCP/UDP port number and IP address.

#### **Optional 2 port serial connection, Modbus gateway**

It builds optional 2 port serial connection for RS232; RS422; RS485 in which RS422/RS485 has 2.5KV isolation protection. The built-in Modbus gateway can convert Modbus RTU/ASCII to Modbus TCP for device control.

#### **Support various VPN applications and firewall**

Besides traditional VPN peer to peer tunneling, T(P)WAP-5004 support latest Multi-Site VPN function that is an efficient way for Mesh tunneling. The registration is under cloud service and encrypted by SSH makes the connection easy and safe.

It supports Multi-Site VPN, OpenVPN, L2TP over IPsec, IPsec, L2 over GRE, IPGRE, and NAT for various VPN applications.

The built-in Layer-4 firewall includes DDoS, IP address filter / Mac address filter / TCP / UDP port number.

#### **Support Routing Protocol: Static route / RIPv2 / OSPF / BGP / EIGRP**

Lantech router series supports two routing methods: static routing and dynamic routing. Dynamic routing makes use of RIPv2, OSPF, EIGRP and BGP. The user can either choose one routing method to establish the routing table.

#### **DIDO for alarm & Email notice; Event log; Remote Web control**

2 sets of DIDO function can support additional high/low physical contact for designate applications besides Port / Power events, for example, DIDO function can trigger alarm if the router was moved or stolen. In case of events, the T(P)WAP-5004 will immediately send email and trap. The event log can be sent via syslog, emails or trigger the alarm relay. When the router is at remote area with limited access, Web control can help to get router status or remotely reboot by Web.

#### **Wide range input voltage from 16.8~137.5VDC (WV model); PoE model built-in 4 port PoE at/af with 60W budget**

The T(P)WAP-5004 is able to work from 16.8~137.5V (WV with isolation) and PoE model built-in 4 port PoE at/af with PoE budget 60W that is particular good for vehicle, rail train, depot etc. application

#### **Environmental monitoring for inside router info& alerting; Graphic WiFi signal strength**

The built-in environmental monitoring can detect router ambient temperature, voltage, current and total PoE load where can send the syslog, and email alert when abnormal.

#### **Dual image firmware**

It supports dual-image firmware to choose which one to start.

#### **Built-in Managed Switch Function**

Managed switch function is built-in and provides various L2+ functions for network aggregation deployment. It delivers ports and PoE management, VLAN, QoS, multicast, redundant ring, and security functions.

#### **USB port for back up, restore configuration and upgrade firmware**

The built-in USB port can upload/download the configuration and upgrade firmware through USB dongle for router replacement.

***Editable login page of captive portal***

The T(P)WAP-5004 supports editable captive portal function that allows administrator to force end-users redirect to authentication page.
