## OVERVIEW

Lantech I(P)WAP-3006 series is a next generation industrial multi-function VPN router w/up to 2x 802.11ac Wi-Fi + 6x Gigabit Ethernet managed switch incl. 4 PoE ports (PoE model) + 2 serial ports\*\* that supports advanced function of VPN, Load-Balancing, EMMC Flash storage\*\*, Protocol gateway (Modbus), and Wi-Fi roaming. The dual core CPU with 1.6GHz + 256M flash enables the router to multi-task smoothly.

### IEEE 802.11ac dual band radio up to 2.6Gbps bandwidth

With IEEE 802.11ac capability, I(P)WAP-3006 can operate either 5GHz or 2.4GHz bands, offering the maximum speed of 2.6Gbps bandwidth (1.3Gbps per 1AC). It is also compatible with 802.11g/n that can work with 2.4GHz for longer range transmission.

The Wi-Fi 11ac supports AP/Bridge/AP Client modes can be diverse for most of wireless application. Working with load-Balancing "Priority" mode, the AP client can enable router to transmit on Wi-Fi with first priority.

### Support AP/Bridge/Client mode, Mesh roaming

I(P)WAP-3006 supports AP/Bridge/Client mode for different applications.

It also supports client-base roaming to swap between the APs in a network.

### Built-in Wireless Mesh network (WMN)

I(P)WAP-3006 supports Mesh network composed of different nodes. The set of SSIDs allow the wireless client to roam freely without the need for complicated account management. With Mesh protocol, it can provide a reliable, scalable, stable and seamless network topology.

#### **Optional EMMC Flash storage\*\***

The optional EMMC flash storage on the router can offer 8G/16G/32G capacity

#### **MIMO technology with 3T3R and SMA type connectors**

Lantech I(P)WAP-3006 series adapts MIMO technology with smart antenna transmission and reception for 3T3R. With six external detachable Omni connectors and optional antennas, I(P)WAP-3006 can have better Wi-Fi coverage.

#### **Wireless WMM QoS**

I(P)WAP-3006 supports 802.11e standard which defines a set of Quality of Service for wireless LAN applications as well as WMM (WIFI multimedia)

#### **Advanced security & 16 SSIDs**

The security support standards including 64/128bits WEP, WPA/WPA2 PSK (TKIP, AES), 802.1x ensures the best security and active defense against security threats. Lantech I(P)WAP-3006 support up to 16 SSIDs, each SSID has its independent security and encryption.

#### **Load Balancing with 5 mechanism for multi-WANs**

I(P)WAP-3006 supports Load Balancing for WAN connections. There are five schemes for Load Balancing function:

Pack	Algorithm	Description
Basic	Fixed	All traffic will be distributed to a single WAN.
	Failover	Routes connections through preferred WAN link while others stand-by. Sequentially activating another link if the preferred link fails.
	Priority	Select the active WAN according to priority.
	Weighted Round-Robin	Evenly distribute the traffic over all working WAN links in circular order according to the specified weights.
	Custom Route	Routing through the selected WAN for each specific traffic, ex: TCP/UDP port number and IP address.

#### **2 port serial connection, Modbus gateway**

It builds in 2 port serial connection for RS232, RS422, RS485.

The built-in Modbus gateway can convert Modbus RTU/ASCII to Modbus TCP for device control.

#### **VPN and firewall**

Besides traditional VPN peer to peer tunneling, I(P)WAP-3006 support latest Multi-Site VPN function that is an efficient way for mesh tunneling. The registration is under cloud service and encrypted by SSH makes the connection easy and safe.

It supports Multi-Site VPN, OpenVPN, L2TP over IPsec, IPsec, PPTP, L2 over GRE, IPGRE, and NAT for various VPN applications.

The built-in Layer-4 firewall includes DDoS, IP address filter / Mac address filter / TCP / UDP port number.

#### **Support Routing Protocol: Static route / RIPv2 / OSPF / BGP / EIGRP**

Lantech router series supports two routing methods: static routing and dynamic routing. Dynamic routing makes use of RIPv2, OSPF, EIGRP and BGP. The user can either choose one routing method to establish the routing table.

#### **DIDO for alarm & email notice; Event log; Remote Web control**

2 sets of DIDO function can support additional high/low physical contact for designate applications besides Port / Power events, for example, DIDO function can trigger alarm if the router was moved or stolen. In case of events, the I(P)WAP-3006 will immediately send email and trap.

When the router is at remote area with limited access, Web control can help to get router status or remotely reboot by Web.

#### **Wide range input voltage from 9V-56VDC (24V Model); PoE model built-in 6 port PoE at/af switch with 80W budget**

The I(P)WAP-3006 is able to work from 9VDC to 56VDC and PoE model built-in PoE at/af with PoE budget 80W@12V /80W@24V&48V that is particular good for vehicle, rail train, depot etc. application.

#### **Environmental monitoring for inside router info& alerting; Graphic WIFI signal strength**

The built-in environmental monitoring can detect router ambient temperature, voltage, current and total PoE load where can send the syslog, and email alert when abnormal.

#### **Built-in Managed Switch Function**

Managed switch function is built-in and provides various L2+ functions for network access deployment. It delivers ports and PoE management, VLAN, QoS, multicast, redundant ring, and security functions.

#### **USB port for back up, restore configuration and upgrade firmware; Dual image firmware**

The built-in USB port can upload/download the configuration and upgrade firmware through USB dongle for router replacement.

It supports dual-image firmware to choose which one to start.

**Editable login page of captive portal**

The I(P)WAP-3006 supports editable captive portal function that allows administrator to force end-users redirect to authentication page.

**Ruggedized industrial design and FCC, CE & E-marking\*\* certificate**

The I(P)WAP-3006 is designed to meet with industrial network environment with IP 30 housing. It passed serious tests under

extensive Industrial EMI and environmental vibration and shocks standards.

With CE & FCC radio certification for WIFI and E-marking\*\* certificate, the I(P)WAP-3006 is best for outdoor community, vehicle, process control automation etc application.
