

IES-0208T (IP67/IP54)

8 10/100TX + 2 GigaT X-coded IP67/IP54 rated

EN50155 Ethernet Switch

- EN50155 verification / E-mark certified
- Provides M12 connector with IP67 or IP54 rated protection
- Wide Operating Temperature from -40°C to 75°C
- Wide range dual power inputs 9~60VDC with optional bypass protection for 1-pair GigaT ports
- 110V single power input 43~137.5V for 110V model

OVERVIEW

Lantech IES-0208T (IP67/IP54) is an 8 10/100TX + 2GigaT X-coded with M12-connector EN50155 unmanaged Ethernet switch for IP67 or IP54 rated protection, which meets the high reliability requirements demanded by industrial rolling stock applications.

The IES-0208T (IP67/IP54) is designed to meet with critical network environment with IP67/54 enclosure and M12 connectors for protection against dust and water. IP67 model can be immersed 1 meter under water for 30 minutes long, so it is the best to place in the highly damp and moisture area in the train, vehicle or rail-side. Both have passed harsh environmental testing to comply with Industrial EMI and Safety standards as well as stability testing such as Free fall, Shock, and Vibration. For a greater flexibility in application the IES-0208T (IP67/IP54) supports an extended operating

temperature range from -40°C to 75°C.

The wide range dual power input from 9V~60V fits with most of train/vehicle usage. The 110V model offers dual power supply that can be powered from 43~137.5VDC.

EN50155 for rolling stock, EN45545 fire and smoke verification

With EN45545-2 Fire & Smoke, EN50155 verification and certification, the IES-0208T (IP67/IP54) is best for railway and vehicle applications.

Optional GigaT bypass protection

The optional 1 pair bypass relay is set to bypass the switch to the next one when power is off in order to protect the network from crashing. Lantech bypass caters to remain in bypass mode until the switch is completely booting up when power is back to avoid another network lost.

FEATURES & BENEFITS

- 8 10/100TX+2GigaT X-coded EN50155 Unmanaged Ethernet Switch with M12 connectors and IP67/54 rated protection
- Dual Power Design with wide DC9~60V input
- 110V model support dual 43~137.5VDC power
- Back-plane (Switching Fabric): 3.6 Gbps
- 8K MAC address table
- Wide Operating Temperature (-40°C ~75°C)
- Din rail** and wall mount design
- EN45545-2 Fire & Smoke, EN50155 and EN61373 shock/vibration verification
- E-mark certified
- Bypass protection** - Bypass failed switch caused by power failure of switch to protect network intactness
